Published source and harmonised matrix
121 patients | 53 asthma, 35 bronchiectasis, 33 COPD | 78 shared PubChem CIDs
Release generation: fit on the full source matrix
Fit and archive
Saved log1p / min-max
Conditional WGAN-GP
Generate profiles
Seeded model draws
Inverse transform
Reference dataset
6,000 synthetic records
2,000 per class
Benchmark evaluation: refit within each real training fold
Define patient folds
Five fixed splits
Training-only transforms
Fit synthesis methods
Generate within folds
500 draws per class
Evaluate and archive
Untouched real test folds
Samples and predictions
